

CAPABILITIES STATEMENT

COLORADO LIGHTING, INC. provides sustainable energy efficient solutions from consultation through installation and recycling. We enhance the efficiency of a lighting system for our customers through expert assistance in (1) specifying which products will produce the greatest energy savings while providing maximum light output, (2) specifying what light level is most appropriate for the work environment, (3) installing the new lighting products and (4) maintaining the lighting system. We provide a full service to our customers, the key element being that relationship we have with our customers -- a long term relationship we desire to maintain. When we recommend a product or system, we stand behind that product and its performance.

COLORADO LIGHTING, INC. was founded in 1977 and has steadily grown over the past 30 years. We have on staff certified lighting consultants, journeyman electricians, master electricians, and certified lighting technicians. Our employees drive fully stocked service vehicles. In addition to our service vehicles, we have fully stocked bucket trucks with the capability of reaching up to a 100 ft. working height. We also have 24-hour on-call service as well as GPS locating capabilities and Nextel 3-way radio communications.

Markets served: Commercial, Government

Please find listed below a breakdown of our services:

LIGHTING MANAGEMENT –

Inside and outside lighting maintenance with monthly inspection and service contracts to meet your needs. We can provide CAD layouts of a facility that detail the electrical equipment and lighting fixture locations. This information can be input into our online system, and customers can log in and access information regarding their properties. This information can also be coupled with controls and self-diagnostic systems to help reduce maintenance costs.

ELECTRICAL DIVISION –

Service work of any kind and specializing in Computer Wiring and Lighting Control Systems.

REBATE PROGRAMS –

Energy audits, detailed energy analysis, financing and rebate money from Excel Energy. We are actively involved with the utility incentive programs and can assist companies with taking advantage of the 2005 EPACT tax incentives.

FEDERAL ENERGY REDUCTION GOAL –

Consultation, installation, hazardous waste disposal – to help agencies meet energy efficiency goals in accordance with Executive Order 13423.

CONSULTING –

Consultation and evaluation of your present lighting and/or electrical system to determine the best solution for your specific needs. We have sophisticated lighting layout software to assist with the design of your lighting system. Our on-staff lighting consultants have earned CLEP, CLMC, and LC certifications.

PRODUCT SALES –

Lamps, ballast, fixtures, and electrical products.

We have a very comprehensive safety program, designed specifically for our industry. We are covered with complete liability insurance.
